

Product physical properties & technical information

Our microbial products:

- ❑ Are naturally occurring bacteria
- ❑ Contain no animal derived material
- ❑ Are not genetically manipulated
- ❑ Include additional strains according to the treated waste
- ❑ Require a maturation time of at least 12 hours
- ❑ Each gram of our bacterial product contains 10^9 c.f.u.
- ❑ During the maturation time duplicate their population every 20 minutes
- ❑ Require no additional chemical analysis from conventional when applied
- ❑ Require no additional investment in order to be applied

Product physical properties & technical information

Physical State	Solid (Powder)
Color	Brown
Odor	Yeast like odor
Relative Density	0.6 – 0.8 gr/cm ³
pH	Neutral
Carrier %	> 99%
Carrier material	Bran
Type	Single cell
Nutrients	Included
Maturation time	> 12 hours
